- Option to earn 100% in large property totaling 179 claim units and 2,864 hectares.
- Located 65 km northeast of Sudbury. Road accessible.
- Covers Proterozoic basal conglomerate horizon analogous to the Witwatersrand Basin in South Africa, which has produced 1.5 Billion ounces of gold.
- 2006 mechanical stripping and sampling program by EDG returned surface values to 3.5 g/t Au across 13 metres.
- 2007 diamond drilling program returned widespread gold mineralization in basal conglomerate to 1.67 g/t Au over 8.4 metres.
- Multiple untested geophysical and geochemical targets.
- World class target in terms of model and tonnage potential.
- Extensive 2008 diamond drilling program.

TURNER GOLD-URANIUM PROJECT, ONTARIO

- 100% owned by EDG. Located 40 km northwest of Pardo in similar geologic environment.
- Previous sampling to 0.27% U3O8 over 7 feet, with anomalous gold values in grabs to 0.572 g/t.
- Underlying Archean iron formation separate gold target.
- Only limited work by EDG to date.

BQ POLYMETALLIC PROJECT, BRITISH COLUMBIA

- Option to earn 100% in large 6,688 hectare property. Located 50 km northwest of Smithers. Road accessible.
- Covers favourable geologic environment for sediment hosted, porphyry related gold deposits.
- First pass drilling by EDG in 2006 returned 1.0 g/t Au over 20.0 metres.
- 2006-2007 soil geochemistry and Induced Polarization surveys define prospective horizon over five kilometre strike length.
- Extensive 2008 diamond drilling program.

NECHAKO GOLD PROJECT, BRITISH COLUMBIA

- Joint venture project between EDG (67%) and Hunter Dickenson Group's Amarc Resources (33%).
- Covers epithermal gold mineralization in Cretaceous sediments, with historic gold intercepts to 0.61 g/t Au over 64 metres.
- Deep (+400 metre) 2008 diamond drilling program.
