Corporate Disclosure

The information contained herein, while obtained from sources which we believe are reliable, is not guaranteed as to its accuracy or completeness. The company is an exploration stage mineral resource exploration company and none of its mineral projects have yet to be proven to be economic. The contents of this presentation is for information purposes only and does not constitute an offer to sell or a solicitation to purchase any securities referred to herein.

Forward-looking Statements

This presentation contains "forward-looking information" within the meaning of applicable Canadian securities regulations. All statements other than statements of historical fact herein, including, without limitation, statements regarding the company's plans, goals or objectives and future exploration, development, potential mineralization, exploration results and future plans are forward-looking statements that involve various risks and uncertainties. There can be no assurance that such statements will prove to be accurate, and actual results and future events could differ materially from those anticipated in such statements. Readers are advised not to place an undue reliance on forward-looking statements.

Management & Directors

ROBERT T. BOYD, President, CEO & Director

- Senior mining executive with 37 years of experience in exploration, executive-level management, corporate finance and corporate governance.
- Serves on several corporate and industry association Boards.
- Former President, CEO, and Director of Ashton Mining of Canada Inc. & Athabasca Potash Corporation.
- Former VP Exploration for Homestake Canada.
- Member of the Association of Professional Engineers and Geoscientists of B.C., the Society of Economic Geologists, and a fellow of the Geological Association of Canada and Gemmological Associations of Great Britain and Canada.

TERESA CHENG, CFO & Corporate Secretary

- Former CFO at Atna Resources Ltd.
- 20 years in the mineral exploration industry.
- Strong familiarity with financial and regulatory requirements.

Board of Directors

H. ROSS ARNOLD, Director

Atlanta based venture capitalist and investor. Founder and majority owner of Quest Capital Corp., which owns a majority or controlling interest in more than 15 companies, with annual revenues in excess of US$400 million.

RICHARD GILLIAM, Director

President of Cumberland Development Company (a private LLC and investment company). Former President, Founder and largest shareholder of Cumberland Resources Corporation, a privately owned coal mining company that produced about 8 m tons of coal per year in eastern North America. In 2010, Cumberland was purchased for US$960 million in cash and shares.

J. CHRISTOPHER MITCHELL, Director

A metallurgist whose career in the mining industry spans more than four decades Previously served as a director of First Point Minerals Corp. Orvana Minerals and Delta Gold. Also previously served as CFO for Canterra Minerals Corporation and Independence Gold Corp. (formerly Silver Quest Resources). Former Sr. Vice President of Viceroy Resources Corp. and Executive Vice President and CFO of Orvana Minerals Corp.

ROBERT PEASE, Director

Director of Pilot Gold. Former President, CEO and Director of Sabina Gold & Silver Corporation. Former Founder, President & CEO of Terrane Metals Corp (acquired by Thompson Creek Metals in 2010), former Director of Richfield Ventures (acquired by New Gold Inc.). With the Placer Dome group for 25 years.

Key “Drill Ready” Project Summaries

ELEPHANT MOUNTAIN Gold (100%) – Rampart Eureka District, Alaska

- Intrusive hosted Stockwork Gold. – Road accessible
- 1992 Placer Dome - Drill hole 0.514 gpt gold over 99.4 metres.
- 1991 Gold soil anomaly at least 1,830 by 460 metres in size. Portion confirmed in 2015 at 1000 x 250 metres with values exceeding 100 ppb gold
- Partially drained by placer gold bearing creeks active since 1898.
- Similar age and geological setting to the Fort Knox Mine, Livengood, Brewery Creek, and Dublin Gulch deposits in the Tintina Gold Province of Alaska and the Yukon.

PARDO JV Gold (35.5%) – Pardo Township, Ontario (on Road near Sudbury)

- Precambrian basal conglomerate analogous to Witwatersrand Basin in South Africa.
- 2013 surface discovery with values up to 40.1 gpt gold over 22.5 metres (estimated true width 2 metres).
- 2014 surface discovery with values up to 10.4 gpt gold over 23 metres and 5.2 gpt gold over 140 metres (estimated true width 2 metres).

Within the Yukon-Tanana Reduced Intrusive-Related Gold District

Elephant Mountain Gold Project
Eureka – Manley Hot Springs District, Alaska

- **Option to own 100% – Total US$200,000 work, US$200,000 cash, and 400,000 Endurance shares to vest ownership by December 2017. Subject to 2% NSR. Work Requirements Largely completed.**
- ***0.514 grams per tonne gold ("gpt") over 99.4 metres*** **in altered stock work veined and fractured intrusive - 1992 drilling by Placer Dome Inc.**
- ***1,830 by 460 metre gold-arsenic soil anomaly*** **reported in 1991.**
- **Encouraging "grab" samples *12.98 gpt, 5.21 gpt, 4.4 gpt & 3.02 gpt gold.***
- ***1,370 by 460 metre IP Chargeability anomaly*** **reported in 1992 – untested.**
- **Un-glaciated terrane - Area drained by placer gold – mined since 1898.**
- **2015 Auger Drilling – *Defines 1,000 x 250 metre gold-arsenic-antimony soil anomaly with values exceeding 100 ppb gold at South Zone target.***
- ***2016 Diamond Drilling in Progress***

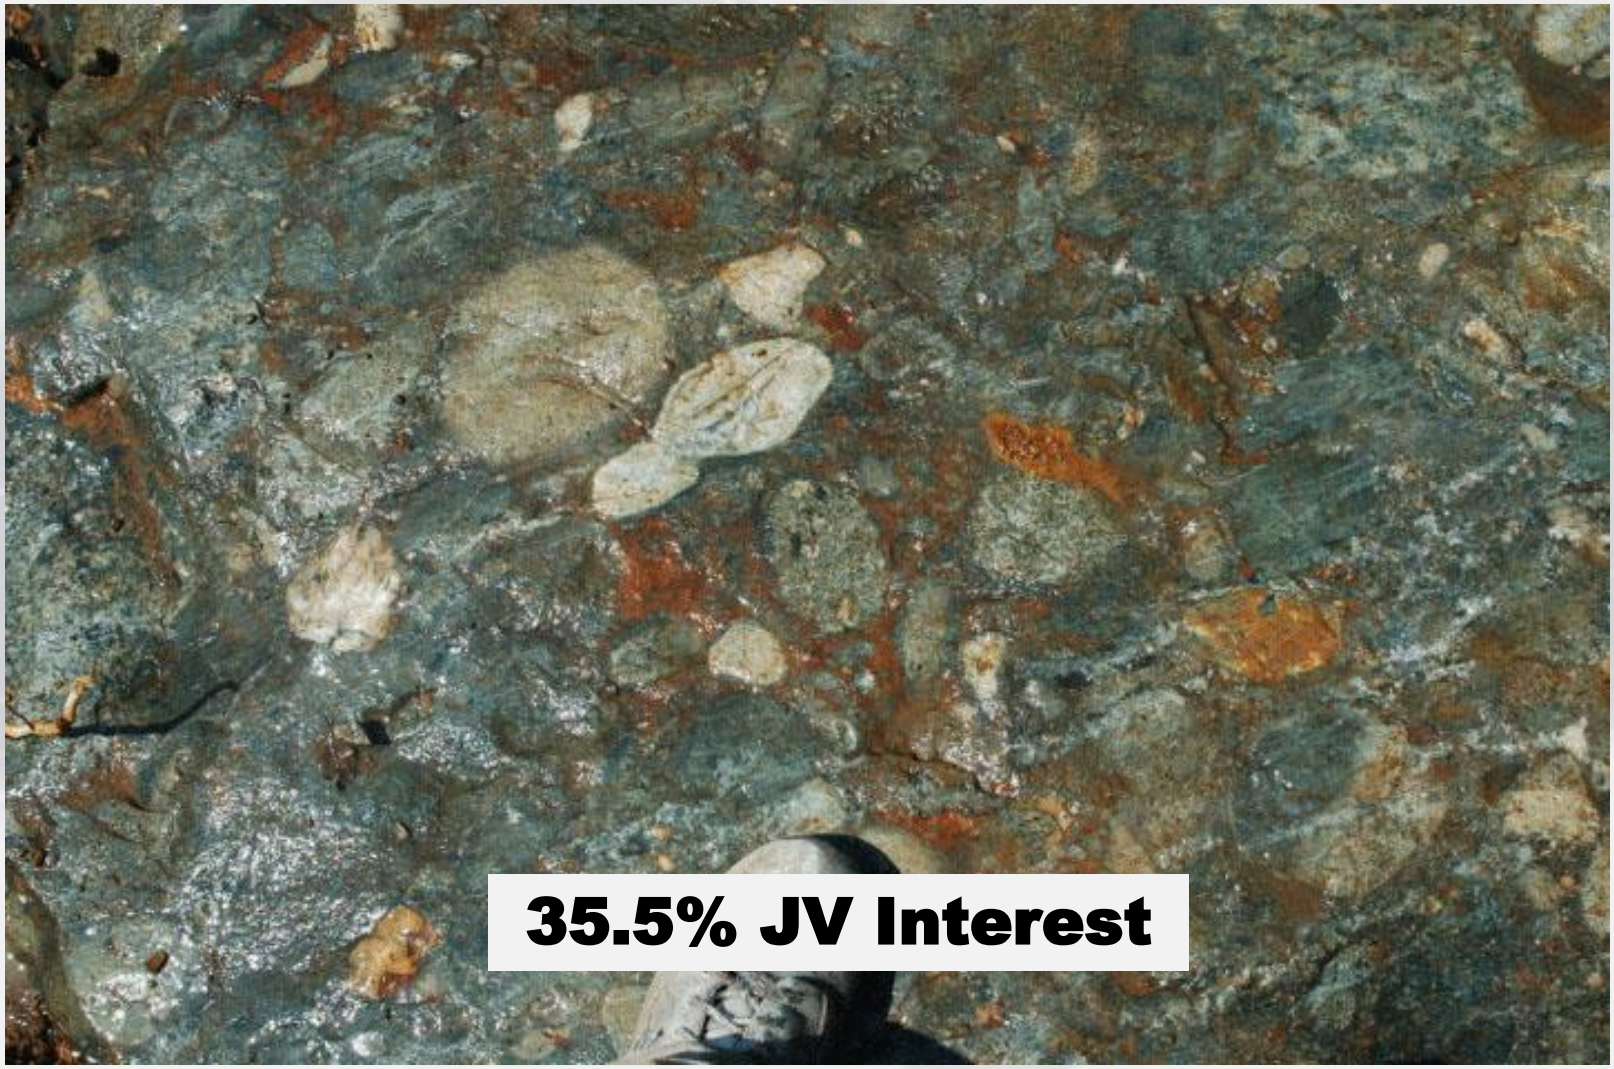
PARDO GOLD JOINT VENTURE



Pardo JV Gold Project, Ontario

Model analogous to Witwatersrand Basin in South Africa

- A Joint Venture with Endurance owning 35.5%.
- Located 65 km northeast of Sudbury, Ontario. Road accessible.
- Covers PreCambrian (Huronian) basal conglomerate analogous to Witwatersrand Basin in South Africa, which has produced 1.7 billion ounces gold.
- Between 2005 and 2012, 318 vertical drill holes have been completed to target the definition of gold-enriched conglomerate channels.
- The 2012 JV Drilling Program increased the size of known Trench 2 surface deposit to about 300 x 300 metres. A basin analysis study with Witwatersrand experts prioritized the joint venture claims.
- 2013 surface prospects with cut channel values up to 36.5 gpt gold over 31 metres and 28.7 gpt gold over 20 metres (estimated true width 2 metres).
- 2014 surface discovery with cut channel values up to 10.4 gpt gold over 29 metres and 5.2 gpt gold over 140 metres (estimated true width 4 metres).
- 2015 Winter Drill program on the Godzilla Zone confirms continuity of host conglomerate. 2016 Program Proposed and under consideration.

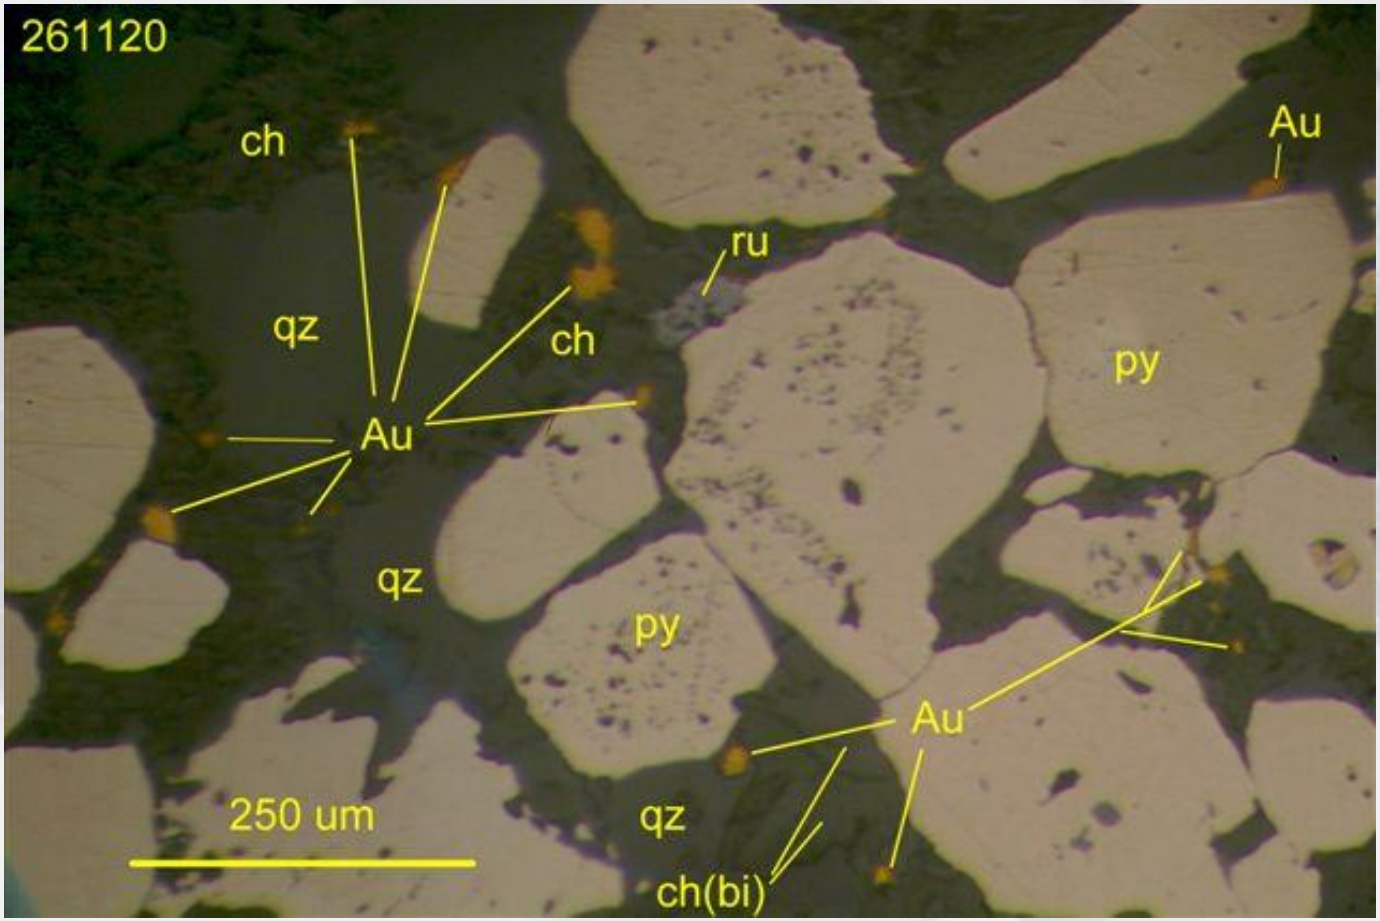
Polished Section of Gold Mineralization



Gold Assay of 12.88 gpt

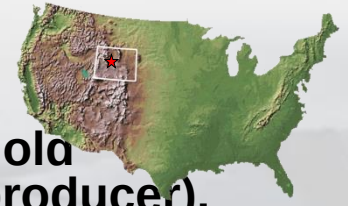
Note abundant free gold on edges of rounded pyrite grains.

ENDURANCE GOLD

RATTLESNAKE HILLS 2% NSR ROYALTY

Rattlesnake Hills District, Wyoming
Intrusive Related Gold Project

Rattlesnake Hills District, Wyoming



- Geological setting similar to major alkaline intrusive-related gold systems, such as Cripple Creek, Colorado (20 Million ounce producer).
- In October 2015, Endurance sold its ownership in its property for 1,400,000 shares of GFG Resources and US$150,000 in cash. GFG is currently private but will become public through a RTO in Sept 2016
- GFG Resources also granted Endurance a 2% Net Smelter Return (NSR) royalty on approximately 7,000 acres covering the Northern Eastern and Western extensions of the Rattlesnake Hills alkaline intrusive-related gold district, Wyoming.
- GFG Resources has consolidated the remainder of the Rattlesnake Hills District through purchase and staking.
- As a result Endurance has swapped its 100% ownership interest in a portion of the Rattlesnake Hills district for equity ownership exposure to the entire district including the North Stock Discovery.

Next Steps and Objectives

GFG is planning a US$750,000 exploration program on the entire district in 2016 including 6000 to 8000 metres of drilling to test multiple gold targets with the objective of new discoveries in this emerging district.
